Claude Cohen-Tannoudji (born 1 April 1933) is a French physicist. He shared the 1997 Nobel Prize in Physics with Steven Chu and William Daniel Phillips for research in methods of laser cooling and trapping atoms. Currently he is still an active researcher, working at the École Normale Supérieure in Paris.

In quantum mechanics, the Pauli equation or Schrödinger–Pauli equation is the formulation of the Schrödinger equation for spin-½ particles, which takes into account the interaction of the particle's spin with an external electromagnetic field. It is the non-relativistic limit of the Dirac equation and can be used where particles are moving at speeds much less than the speed of light, so ...

Catastrofe ultravioletta - Wikipedia

O sistema massa-mola simples é constituído por um corpo de massa m acoplado a uma mola com fator restaurador k (constante de deformação), enquanto a outra extremidade está ligada a um ponto fixo conforme mostrado na Figura 1. Se tal sistema encontra-se em equilíbrio, a posição da massa é denotada por O ($x = 0$) e toda vez que a massa é deslocada em relação a ponto, surge uma força ...

Superposición cuántica - Wikipedia, la enciclopedia libre

En mecánica cuántica, la barrera de potencial finita es un problema modelo mono-dimensional que permite demostrar el fenómeno del efecto túnel. Para ello se resuelve la ecuación de Schrödinger independiente del tiempo para una partícula que incide sobre una barrera de potencial

Superposition in der Quantenmechanik ist vergleichbar mit der aus der klassischen Wellenlehre, da quantenmechanische Zustände ebenfalls durch Wellenfunktionen beschrieben werden. Zu beachten ist hierbei jedoch, dass die quantenmechanischen Wellenfunktionen, im Gegensatz zu den klassischen, noch keine „reale“ bzw. eindeutige Bedeutung haben.

Superposition (Physik) – Wikipedia

Mit dem Doppelspaltexperiment erbrachte Thomas Young 1802 erstmals Belege für die Wellennatur des Lichts. Bei diesem Versuch wird in dem Weg eines Lichtstrahls eine Blende mit einem Doppelspalt aufgestellt, wobei der Abstand der Spalte in der Größenordnung der Wellenlänge liegt.
