cpm mechanics the critical pdf

The critical path method (CPM), or critical path analysis (CPA), is an algorithm for scheduling a set of project activities. It is commonly used in conjunction with the program evaluation and review technique (PERT). A critical path is determined by identifying the longest stretch of dependent activities and measuring the time required to complete them from start to finish.

In video games, strafing is the technique of moving the player's character from side to side, rather than forward or backward. In the context of first-person shooters, it refers to the movement alone, even when no weapon is being fired. Sidestepping is an integral part of any first-person or third-person shooter as it allows the player to dodge incoming fire while keeping their view aimed at ...
