Improving the safety of health information technology requires shared responsibility: It is time we all step up

Improving the safety of health information technology

An electronic health record (EHR), or electronic medical record (EMR), is the systematized collection of patient and population electronically-stored health information in a digital format. These records can be shared across different health care settings. Records are shared through network-connected, enterprise-wide information systems or other information networks and exchanges.

Electronic health record - Wikipedia
