Math Methodology is a three part series on instruction, assessment, and curriculum. Sections contains relevant essays and resources: Part 1: Math Methodology: Instruction The Instruction Essay (Page 1 of 3) on this page contains the following subsections: Introduction to Teaching Challenges

Math Methodology: Instruction Essay: Introduction to

An entity-relationship model (ER model for short) describes interrelated things of interest in a specific domain of knowledge. A basic ER model is composed of entity types (which classify the things of interest) and specifies relationships that can exist between entities (instances of those entity types).

Entity-relationship model - Wikipedia

Factors Contributing To Students' Poor Performance in

The Wald test is a parametric statistical test named after the statistician Abraham Wald. Whenever a relationship within or between data items can be expressed as a statistical model with parameters to be estimated from a sample, the Wald test can be used to test the true value of the parameter based on the sample estimate.

Introduction to Mediation, Moderation, and Conditional Process Analysis, Second Edition: A Regression-Based Approach (Methodology in the Social Sciences) Second Edition

Introduction to Mediation, Moderation, and Conditional

Models of the Universe are described and classified into three major categories: Historic, Expanding, and Cellular. It is shown that all expanding universe models violate the cosmic edge and containment principle. The multi-millennium conflict between the two major world views --the changing dynamic universe and the

unchanging stable universe-- is highlighted.

Models of the Universe - Cellular Universe

Ecological Models and Data in R is the first truly practical introduction to modern statistical methods for ecology. In step-by-step detail, the book teaches ecology graduate students and researchers everything they need to know in order to use maximum likelihood, information-theoretic, and Bayesian techniques to analyze their own data using the programming language R. Drawing on extensive ...

Box and Cox (1964) developed the transformation. Estimation of any Box-Cox parameters is by maximum likelihood. Box and Cox (1964) offered an example in which the data had the form of survival times but the underlying biological structure was of hazard rates, and the transformation identified this.
