Mike, architecture major, Summer 2010 This calculus course was very convenient in the sense that it was online and 4 credits without any major prerequisite. But over the summer I took this class while taking another online class and working 40 hours a week. This calculus class is not good for someone who plans on doing too many other things over the summer.

Calculus (from Latin calculus, literally 'small pebble', used for counting and calculations, as on an abacus) is the mathematical study of continuous change, in the same way that geometry is the study of shape and algebra is the study of generalizations of arithmetic operations.. It has two major branches, differential calculus (concerning instantaneous rates of change and slopes of curves ...

The derivative of a function of a real variable measures the sensitivity to change of the function value (output value) with respect to a change in its argument (input value). Derivatives are a fundamental tool of calculus. For example, the derivative of the position of a moving object with respect to time is the object's velocity: this measures how quickly the position of the object changes ...
