Mark W. Watson: Publications and Replication materials

Evolution is the process of change in all forms of life over generations, and evolutionary biology is the study of how evolution occurs. Biological populations evolve through genetic changes that correspond to changes in the organisms' observable traits. Genetic changes include mutations, which are caused by damage or replication errors in organisms' DNA. ...

Introduction to evolution - Wikipedia

Algorithmic trading is a method of executing a large order (too large to fill all at once) using automated pre-programmed trading instructions accounting for variables such as time, price, and volume to send small slices of the order (child orders) out to the market over time. They were developed so that traders do not need to constantly watch a stock and repeatedly send those slices out manually.

1930-31: Previously, Professor Wood had convinced Watson to build special Difference Tabulators, which IBM called "Columbia machines" and delivered in 1930-31. These machines could process 150 cards per minute and were unique in their ability to rapidly accumulate sums of products or squares []. The Statistical Bureau soon became a service provider to outside organizations like the Rockefeller ...
