An approach note is a note or series of notes that literally approach our target chord tone. The most common

way we do this is with the use of chromaticism. If our phrase takes us to the third of a chord, our approach note could be a semitone behind it, or in front of it.

### **Jazz Guitar Phrasing: How To Use Target & Approach Tones**

As you've seen earlier in the lesson, the approach notes and target tones take up as few beats as 2 eighth notes (the approach note(s) and the target tone), making them a perfect candidate for the fast-paced Rhythm Changes. When first applying the approach note technique over Rhythm Changes, focus on one chord tone at a time.
