In philosophy, naturalism is the "idea or belief that only natural (as opposed to supernatural or spiritual) laws and forces operate in the world." Adherents of naturalism (i.e., naturalists) assert that natural laws are the rules that govern the structure and behavior of the natural universe, that the changing universe at every stage is a product of these laws.

Make it a double: A method for the selective  $\alpha$ -dehydrogenation of amides in the presence of other carbonyl moieties under mild conditions has been developed. This strategy relies on electrophilic activation coupled to in situ selective selenium-mediated dehydrogenation. Mechanistic experiments suggest formation of an electrophilic Se IV species.

Members of Collembola are normally less than 6 mm (0.24 in) long, have six or fewer abdominal segments and possess a tubular appendage (the collophore or ventral tube) with eversible sticky vesicles, projecting ventrally from the first abdominal segment. The Poduromorpha and Entomobryomorpha have an elongated body, while the Symphypleona and Neelipleona have a globular body.

1. Ontological Naturalism 1.1 Making a Causal Difference. A central thought in ontological naturalism is that all spatiotemporal entities must be identical to or metaphysically constituted by physical [] entities. Many ontological naturalists thus adopt a physicalist attitude to mental, biological and other such "special" subject matters.

Significance. We demonstrate the immunosuppressive function of T FH-like cells that are modulated by PD-1 and CTLA-4 blockade in opposing directions, thus broadening our understanding of the incremental activity of combination checkpoint blockade. Our results indicate that these cells may serve as a pharmacodynamic and prognostic biomarker in patients treated with checkpoint blockade.

Nikolai Bernstein's seminal work forms the foundation of much of modern motor control. This collection of papers and discussions published after his death outlines a theoretical framework for understanding how the nervous system controls the way we move.
