complexity of their physiological actions. Current research has clarified their contraindications and identified an expanded role for their use in the treatment of many painful conditions, further broadening their indications. PATHOPHYSIOLOGY OF PAIN In response to tissue injury, specialized nerve endings called

nociceptors are activated.

and Thermo-therapy for the Pain Practitioner The

Systole is defined as from the mitral valve closure to the aortic valve closure, with the rest of the cardiac cycle being defined as diastole. This definition of diastole includes portions of the cardiac cycle that may be considered to be part of systole on the basis of myocardial physiology .

The Cardiac Cycle and the Physiological Basis of Left

Physiologic Basis of Acupuncture by D.E. Kendall, OMD, PhD A rational and consistent approach to the clinical application of needling therapy is better achieved if one has an understanding of the physiological basis of the underlying Chinese medical theory. It was the genius of ancient Chinese physicians that organized the human body
