Exponentiation is a mathematical operation, written as  $b^n$ , involving two numbers, the base  $b$  and the exponent  $n$ . When  $n$  is a positive integer, exponentiation corresponds to repeated multiplication of the base: that is,  $b^n$  is the product of multiplying  $n$  bases:  $b^n = \underbrace{b \cdot b \cdot \dots \cdot b}_n$ . The exponent is usually shown as a superscript to the right of the base. In that case,  $b^n$  is called "b raised ...

In electrical engineering, the power factor of an AC electrical power system is defined as the ratio of the real power absorbed by the load to the apparent power flowing in the circuit, and is a dimensionless number in the closed interval of  $\hat{1}$  to 1. A power factor of less than one indicates the voltage and current are not in phase, reducing the instantaneous product of the two.
