Primary Resources: Science: Life Processes and Living Things

five examples of life processes. Physiological process, those processes specifically pertinent to the functioning of integrated living units: cells, tissues, organs, limbs, and organisms.; Reproduction; Digestion; Response to stimulus: (in terms of movement impulses, secretion, enzyme production, gene expression, etc).In animals, this is mainly the function of the nervous system.

Life processes - Simple English Wikipedia, the free

The living cell is the site of tremendous biochemical activity called metabolism. This is the process of chemical and physical change which goes on continually in the living organism.

Enzymes and Life Processes (Introduction to Enzymes)

Life is a characteristic that distinguishes physical entities that have biological processes, such as signaling and self-sustaining processes, from those that do not, either because such functions have ceased (they have died), or because they never had such functions and are classified as inanimate. Various forms of life exist, such as plants, animals, fungi, protists, archaea, and bacteria.
