Keeping abreast of today's threat landscape is non-negotiable. Enterprises, service providers, and the Internet-at-large would benefit in knowing the latest in technology and threats so they can actively secure their data and systems against compromise.

### **Research and Analysis - Trend Micro USA**

The threat of attack from insiders, or an insider causing harm without malicious intent, is real and substantial. To prevent harm to their assets, historically, organizations focused on external-facing security mechanisms, such as firewalls, intrusion detection systems, and electronic building access systems.
