Chapter 3 Applying Learning Theories to Margaret M
A theory is a contemplative and rational type of abstract or generalizing thinking, or the results of such thinking. [better source needed] Depending on the context, the results might, for example, include generalized explanations of how nature works.The word has its roots in ancient Greek, but in modern use it has taken on several related meanings. ...

An experiment is a procedure carried out to support, refute, or validate a hypothesis.Experiments provide insight into cause-and-effect by demonstrating what outcome occurs when a particular factor is manipulated. Experiments vary greatly in goal and scale, but always rely on repeatable procedure and logical analysis of the results.
