Update: I've announced react-pacomo, a solution for some of the problems with CSS outlined here, without the downsides of Inline Style. So one of the hottest topics in the React world lately is Inline Style, i.e. setting styles with an element's style property instead of CSS. This new and shiny way of doing things promises to make your life easier.

gTLDs are such a mess for so many reasons. At my previous job, we had two separate forests and both were .local. I had to do a domain rename on one so that it ended in .edu and then I had to migrate 20k objects from the other forest into the newly consolidated domain.

## Why you shouldn't use .local in your Active Directory

The health benefits of lemons and lemon juice are pretty well known. But if you're like the majority of people, you are probably squeezing out the lemon juice and tossing the left over lemon peel in the trash!

Saying that it has always been this way, doesn't count as a legitimate justification to why it should stay that way. Teacher and administrators all over the world are doing amazing things, but some of the things we are still doing, despite all the new solutions, research and ideas out there is, to put it mildly, incredible.
