The simians (infraorder Simiiformes) are monkeys and apes, cladistically including: the New World monkeys or platyrrhines, and the catarrhine clade consisting of the Old World monkeys and apes (including humans).. The simian is sister to the tarsiers, together forming the haplorhines. The radiation occurred about 60 million years ago (during the Cenozoic era).

While viral vector techniques make use of the natural aptitude of viruses to efficiently deliver genes directly into target cells, these applications do not come without potential for adverse side effects (). Namely, the use of viruses often present risk for marked immunogenic response, insertional mutagenesis, and cytotoxicity.
