

wrought iron and steel pdf

Wrought iron is an iron alloy with a very low carbon (less than 0.08%) content in contrast to cast iron (2.1% to 4%). It is a semi-fused mass of iron with fibrous slag inclusions (up to 2% by weight), which gives it a "grain" resembling wood that is visible when it is etched or bent to the point of failure. Wrought iron is tough, malleable, ductile, corrosion-resistant and easily welded.

Wrought iron - Wikipedia

Steel is an alloy of iron and carbon, and sometimes other elements. Because of its high tensile strength and low cost, it is a major component used in buildings, infrastructure, tools, ships, automobiles, machines, appliances, and weapons.. Iron is the base metal of steel. Iron is able to take on two crystalline forms (allotropic forms), body centered cubic and face centered cubic, depending on ...

Steel - Wikipedia

At Wisconsin Iron Works we make all of our custom products by hand and with careful attention to detail. Our railings, window guards , gates and columns are made from USA steel. Fire pit rings and log moving tools are made to order. We can make a railing with a simple or very ornamental style to fit your budget. Everything is handcrafted in Wisconsin.
