XII-th Feofilov symposium on spectroscopy of crystals activated by rare- earth and transition metal ions, Ekaterinburg, Russia, invited talk 2005 27. Curriculum Vitae - Mediterranean Journal of Chemistry Abstract. The structure and dynamics of the crystal lattice of MeF 2 fluorites (Me = Ca, Sr, Ba, and Pb) under external hydrostatic compression (0-3.5 GPa) are calculated within the shell model in the pair potential approximation. The first-order structural phase transition from the cubic to the orthorhombic phase in these crystals under pressure is investigated. Structure and dynamics
